

DRACO

When rough diving leaves you with a smile.

Shoulder Armor – Padded wear resistant shoulders – finally a suit that can take as much as you can.

Seal Armor System Zip Off Cuff – Flexibility to use any mfg's ring system with a heavy layer of seal protection.

Heavy Duty Zippered Cover – Provides maximum protection of your dry zipper.

Chill Guard – Keeps body heat in and your undergarments out of the zipper for trouble free operation.

Form Moulded Velcro Tabs – Quality is in the details.

Warm Neck Valve – Drains the seal when you surface.

High Visibility – Reflective logo on neck and sleeves.

Knee Guards – Anatomically shaped, 3-D knee/shin guards for hard-core protection.

Power Pockets – Dual expandable pockets to organize the gear you need.

Toughtex – The best way to armor your suit.

Anatomical Sculpting – Pre-bent arms and legs provides a perfect anatomical fit.

Anatomical Kevlar Reinforced Boot – Angled for the best mix of durability and performance.

A Seat That Grips – Polyurethane embossing provides a non-slip grip and abrasion protection.

www.waterproof.se

- Warm Neck Valve - Now we have improved our frequently imitated Warm Neck design with the addition of a valve to drain the seal area when you surface.
- Vented hood, HAVS. A separated vented hood fits underneath the warm neck collar. Our exclusive Hood Air Venting System uses one-way valves to vent annoying gas buildup in the hood.
- The HAVS hood features a 7 mm double layered protection in critical heat loss areas and glide skin seals for the neck and face.
- Because of the shaping of the Draco, no seams are to be found in the under arm area or in the crotch area, where wrinkling can otherwise cause wearing.

- The boots are extended in the rear calf area, which facilitates an easy step in.
- The boots are cut on an angle to minimize ankle and calf stress while finning.
- Laminated Toughtex nylon coating on the 3,5 mm HEIWA hi-dense neoprene.
- Each suit is tested by an overpressure check.
- A Waterproof 1000 CORDURA bag is also supplied as standard, which can be carried as a backpack.
- SI-TECH valves, swivelling inlet valve and automatic outlet valve.

Accessories

Crux Glove 5 mm, 5-finger – This stylish glove features a glide skin interior and a long zipper for easy donning. Expanding wave flex over layer and a polyurethane embossed protection section in the palm.

Crux Glove 5 mm, 3-finger – A cold water glove that features a glide skin interior and a long zipper for easy donning. Expanding wave flex over layer and a polyurethane protection section in the palm.
